

YURI

Space biotech for a better life

Elevating the Growth of Commercial LEO Life
Science & Manufacturing Markets

Our profitable space lab business is complemented with deals in Biotech

SPACE

EARTH

Same payload

Lab-as-a-Service

Fee for service

Space agencies, research labs, pharma pay us to take bio payloads to space.

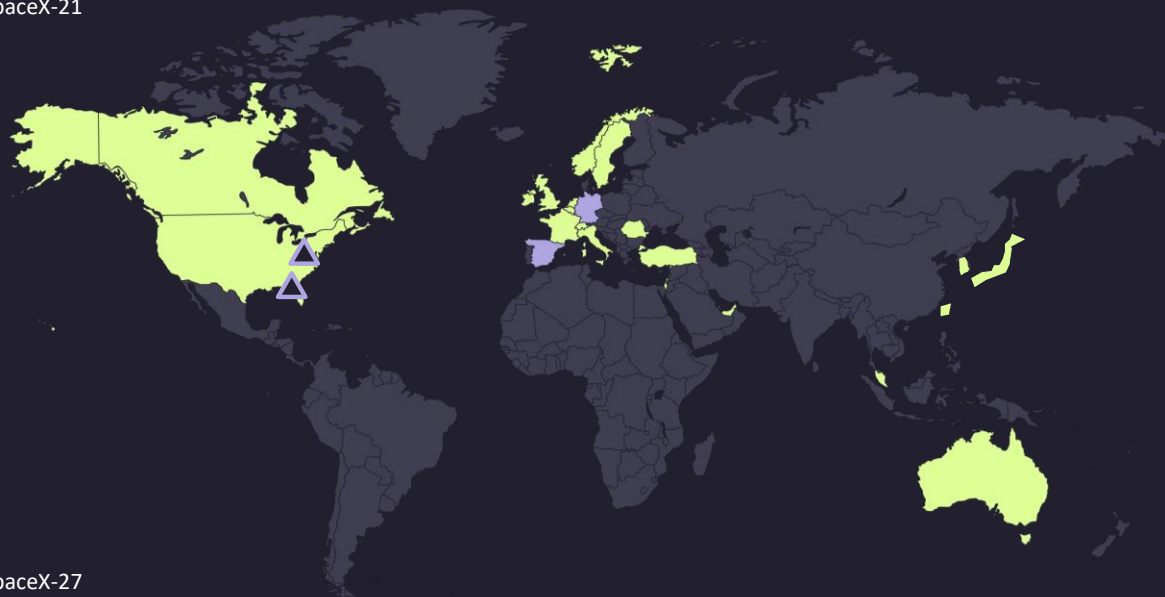

Own Biotech Products

Licensing / product sales

Pharma asset deal

We built a profitable and growing space lab business

151
Labs on the ISS

60
customers,
More than 20 countries

We built a profitable and growing space lab business

Our unfair

advantage

We developed the world's most powerful stack of **hardware**, **wetware** and **data** for space biology

Modular and reusable
bioreactors

Our **ScienceTaxi**, Bio capacities
beyond ISS

Microgravity
Simulation

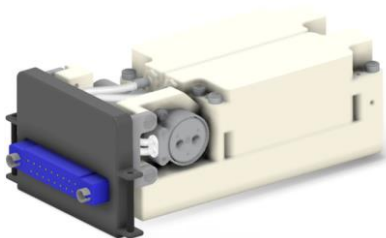

Giant step forward: modularity on functional block basis

From a few specific configurations
(milled from peek).

...

to a nearly limitless number of options
(using 3D printing and modularization)

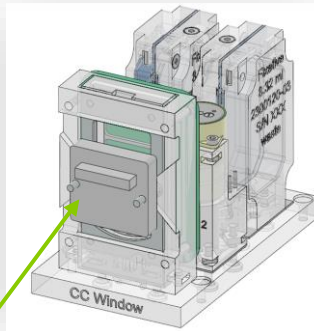

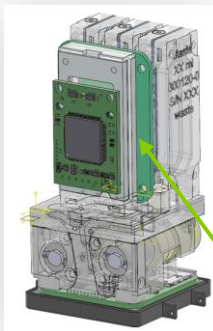

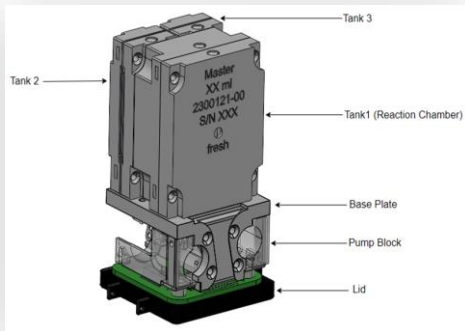

2B+

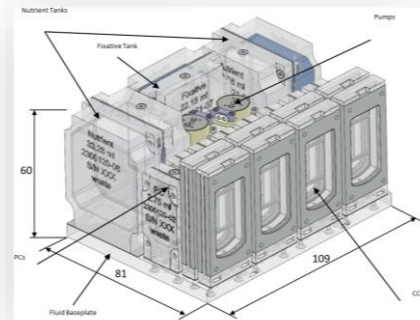

combinations

that even fit completely different form factors
factors

than our ScienceShells (e.g. Biolab)

Culture Chambers with
lensless microscope
