

**Digital solutions improving mental health
and resilience of individuals in challenging environments**

Challenging environments require appropriate and specific psychological support

Space stations

Submarines

Polar bases

Military missions

Oil platforms

Conflict areas

We call them I.C.E. environnements

Isolated

Confined

Extrême

Per year more than \$2 trillions US Health Care for just 4 millions VA (Iraq/Afg)

Just for the Post-Traumatic Stress Disorder: \$25,684 billions

ESA astronauts costs 250M€/year no turn over possible

70%

of injuries treated by the French Army are mental (PTSD)

French Army wounded aid unit

+50%

of astronauts take sleep medications during space missions

Sleep in space: a challenge for sleep medicine on Earth, The Lancet Neurology

4x

more military personnel deployed to the Middle East committed suicide between 2001 and 2021 than those killed on the ground

Thomas Howard Suitt, Boston University

Our Virtual Reality therapeutic protocols are specifically designed to improve mental resilience in I.C.E. environments before, during and after missions

1

Stress management

+45%*

2

Improved sleep

+42%*

3

Mindfulness

+37%*

Tested on more than 100 people

Our goal in 2025 is to provide even more support thanks to our psy AI for astronauts and all future space travelers

Hello Thomas,
how are you today?

Space Agent Traveler (S.A.T.)

S.A.T. will offer them immediate, immersive and personalized psychological support based on their condition and needs

We must think today about tomorrow's solutions for long missions, particularly those where direct contact with Earth will be impossible (40 minutes of latency between Earth and Mars)

6 millions potentiel users just in Europe & USA

(astronauts + military personnel + firefighters)

Examples of clients

COREOD SPACE will be the leader in Mental Health for Space & Defense

COREOD SPACE

Why our solution is the best one on the market?

**Based on
10 years of
research**

More
expertise

**Powered
by IA**

More
personalized

**No motion
sickness**

More
comfortable

**COREOD SPACE is the key player that will address the subject
of mental health in the space and defense sectors in France and Europe**

But our growth potential goes even further ...

Corporates

Hotels / Spas / Airport's lounge

High-level athletes

B2C

Education

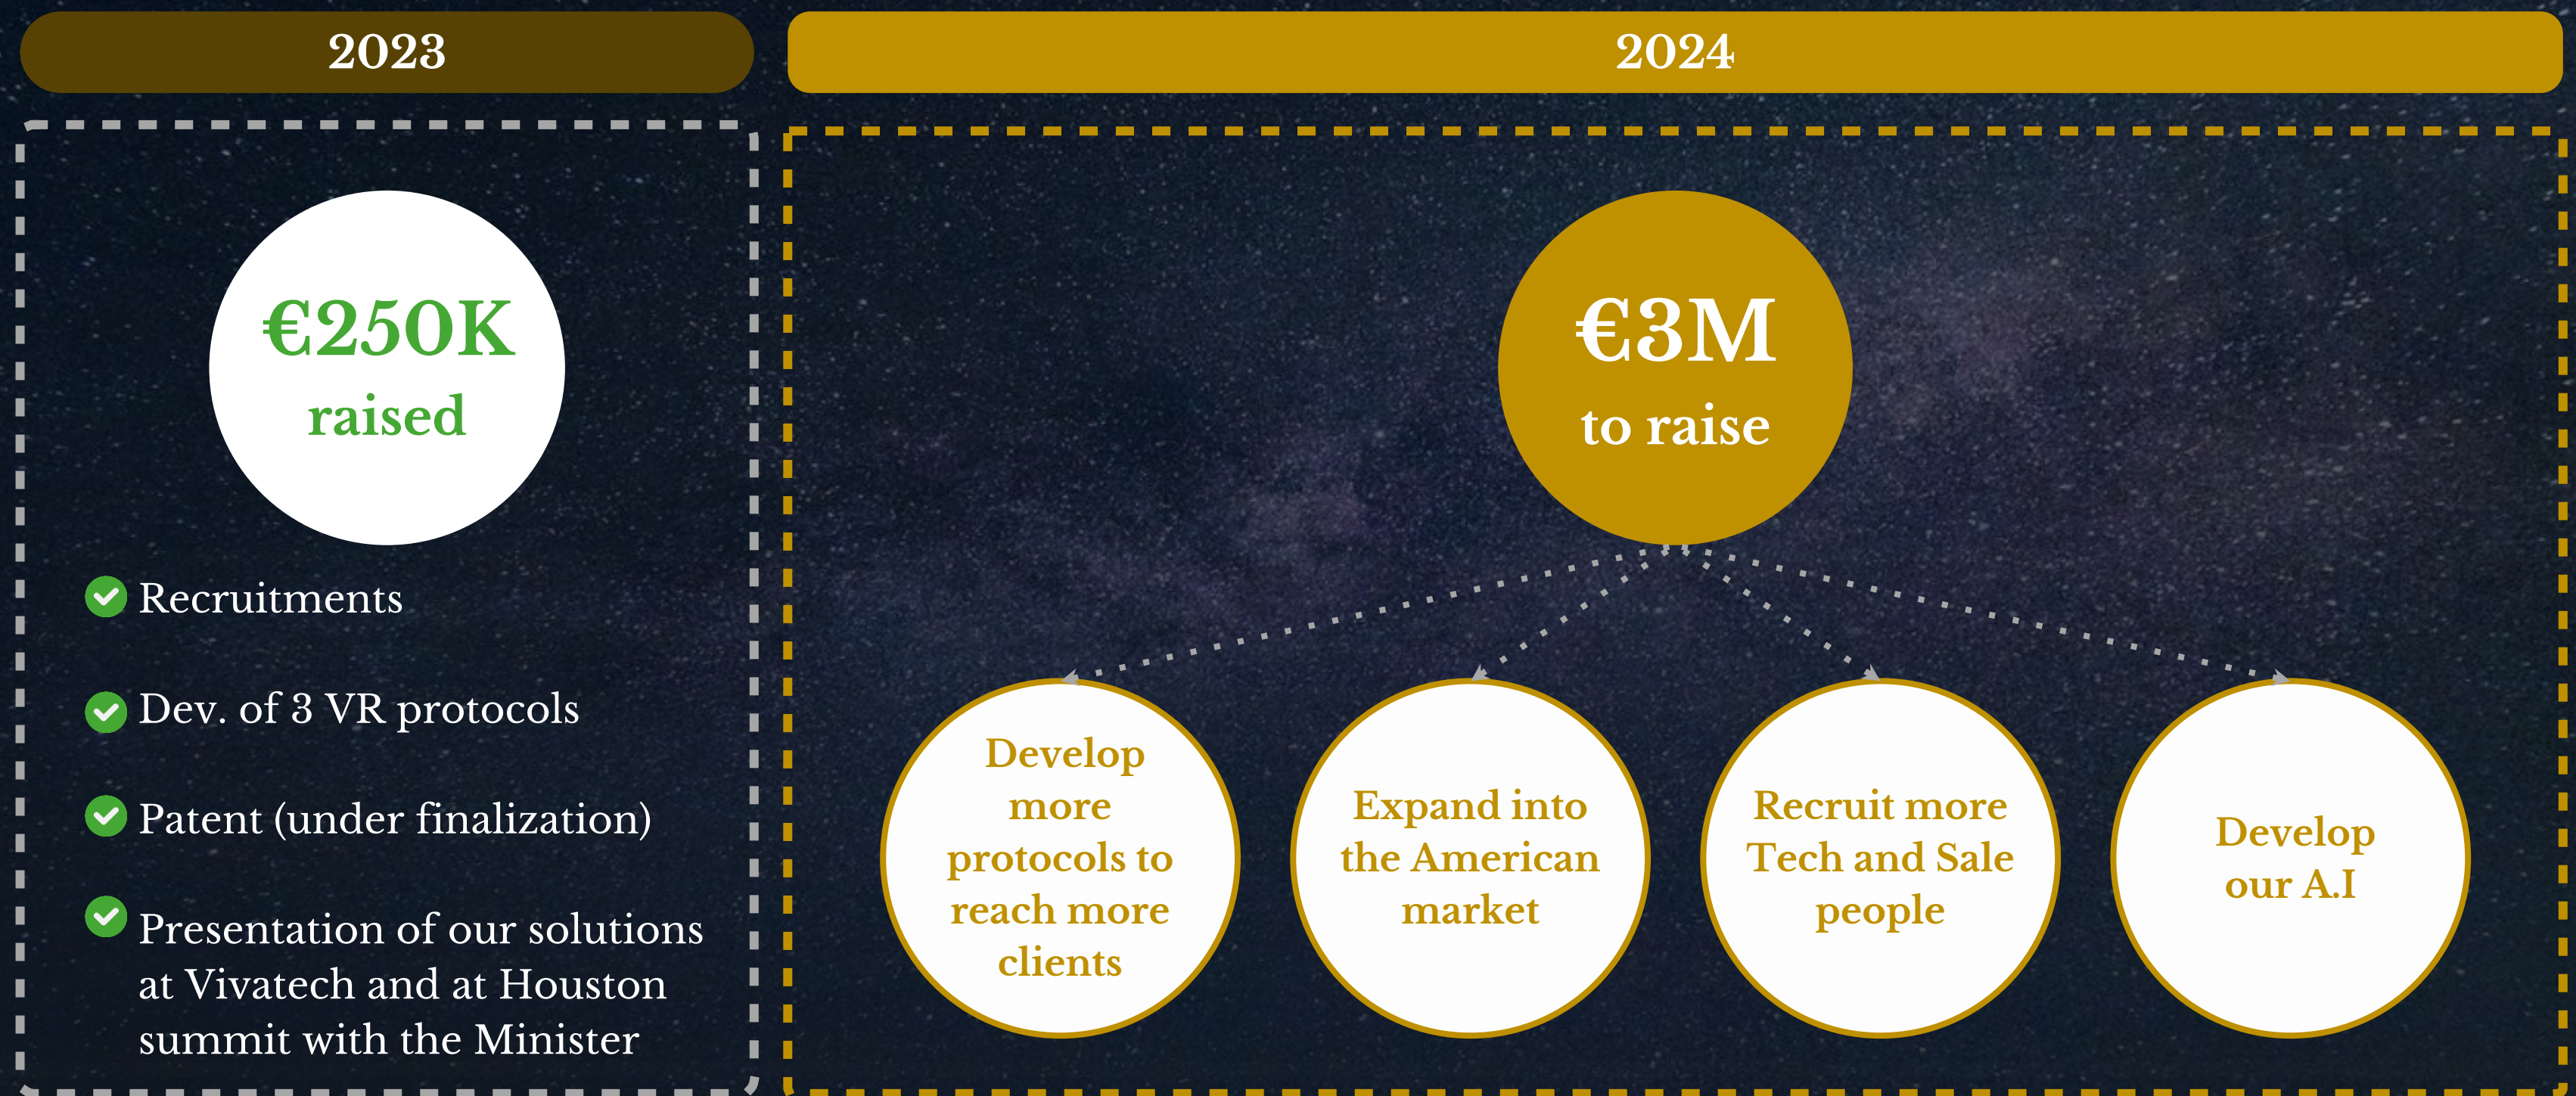

Healthcare

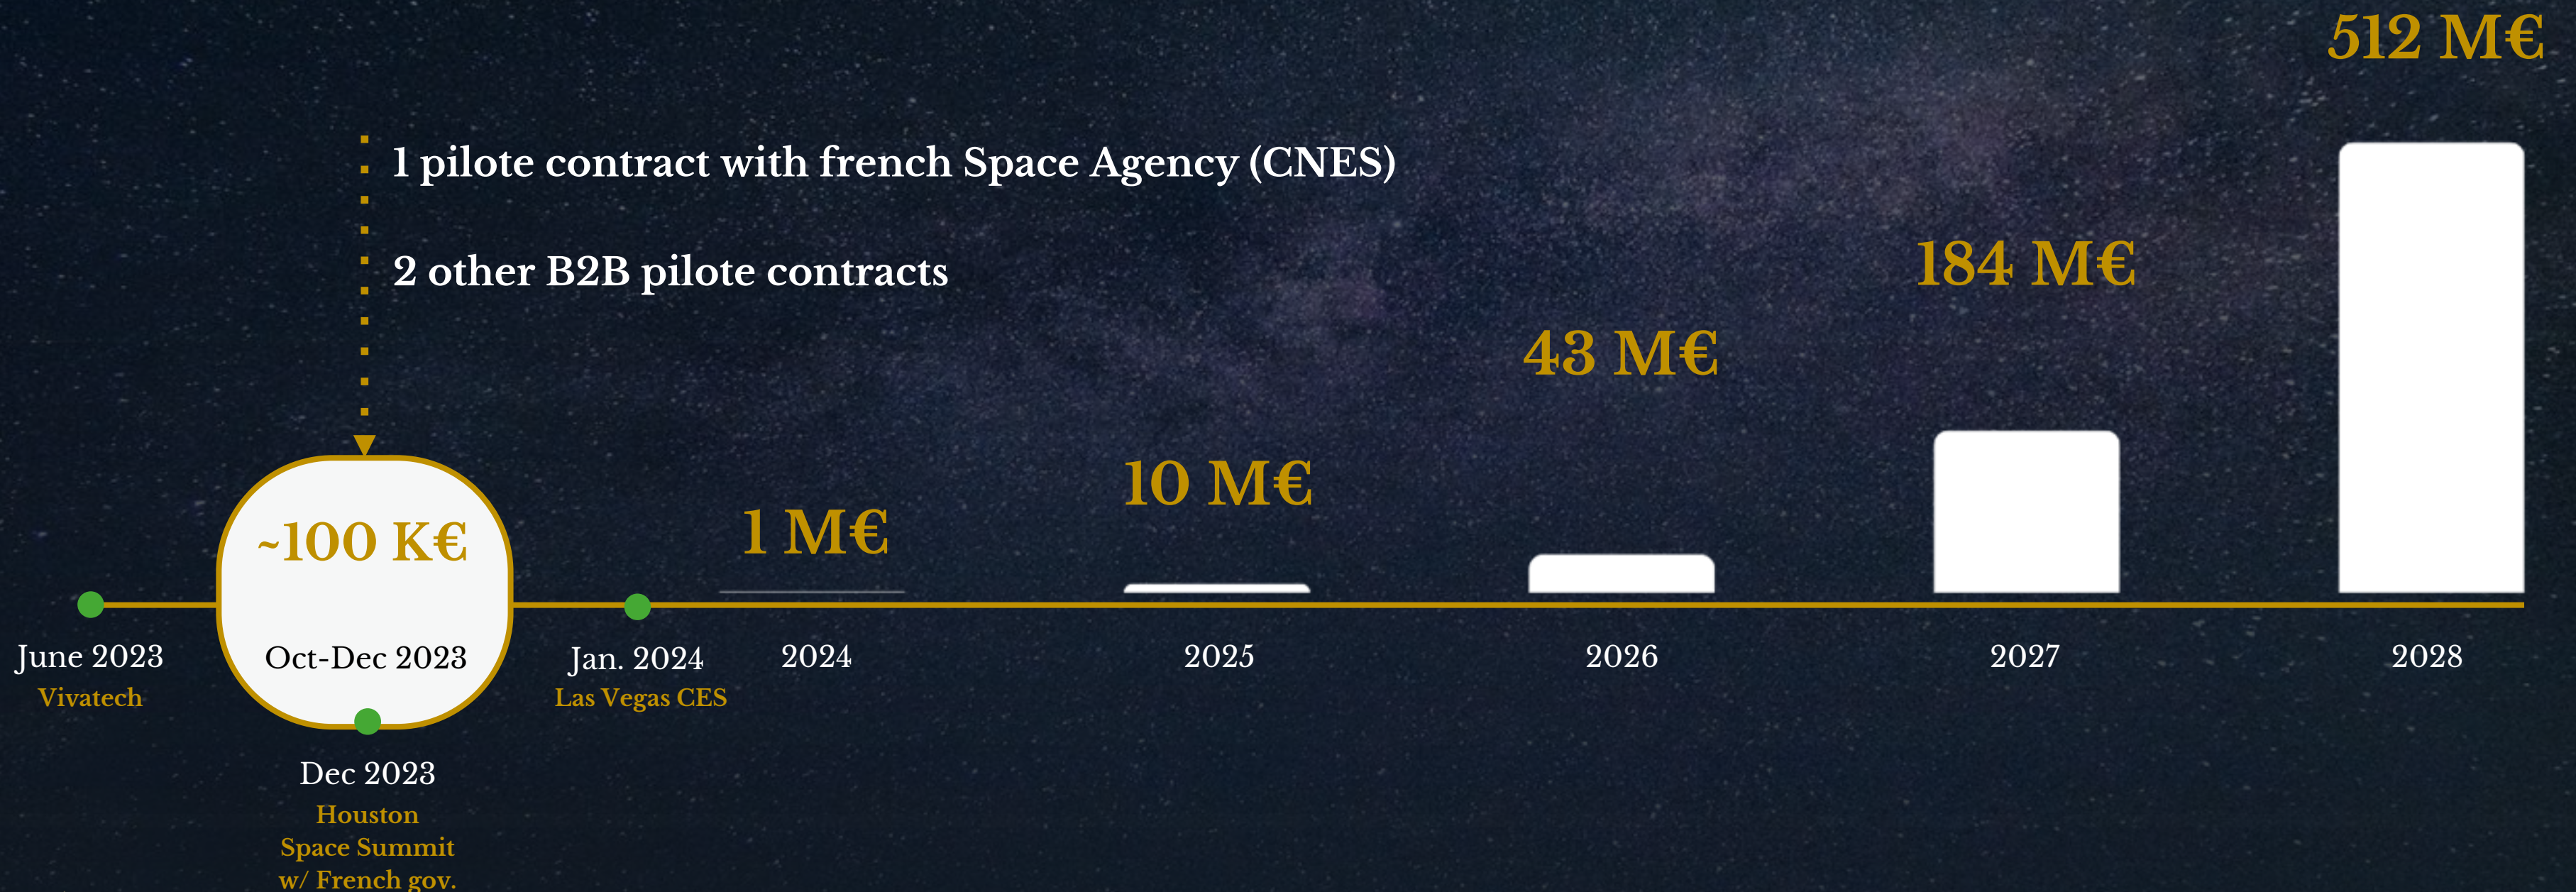

... by tackling wellness global market valued
\$7B

Raising €3M in 2024 to accelerate our growth and become the leader in VR Mental Health solutions

A target of €500+ million in revenue in 2028
thanks to more B2B markets, more locations worldwide and B2C market

A team with complementary expertise to carry out the project successfully
