

# We Make Space Useful for You!

Long-term weightlessness can't be emulated on Earth and has tremendous potential for research and manufacturing of improved pharmaceuticals, photonics, semiconductors, organoids, novel alloys, and many more. Read our overview on the many use cases of microgravity, [here](#). If you are active in these areas, it is now the time to look to the stars, literally.

## Pod

Modular, fault-isolated payload container

## Oasis

Low-cost orbital flight and return capsule

Send Your Payload To Space And Get It Back. Starting At **€15.000.**

We are building Pod, a modular payload container, and Oasis, an ultra-low-cost return vehicle. Our solutions make accessing space as easy as mailing a package. They are designed to fully shield you from the complex requirements and bureaucracy surrounding space exploration, so you can focus on what You do best. Reach out if you want to be part of the next industrial revolution in space!
